

Barcelona, 14th march 2022

Dear all,

Faced with the incessant rise in fuel costs, we are forced to apply a fuel canon surcharge in our rates.

The diesel cost at 1st January was 1,34 Eur / lit and increases until today at 1,85 Eur / lit.

These increases have been absorbed by Tpnova Rail, hoping that prices will stabilize, but this circumstance has not occurred, therefore, we will apply the Fuel Surcharge based on the percentage of diesel cost 30% in Transports.

We will apply the canon through the following scale based on the price of diesel that you can see published on the website of the Ministry of Transport of the Spanish Government:

DIESEL COST/ liter	Surcharge % on transport
from 1,40€ to 1,50€	2,46
from 1,51€ to 1,60€	4,71
from 1,61€ to 1,70€	6,93
from 1,71€ to 1,80€	9,18
from 1,81€ to 1,90€	11,43
from 1,91€ to 2,00€	13,65

This canon will be of immediate application and will be reflected in each invoice, in proportion to the above calculations. For the current month march at this moment the applicable surcharge is 11,43%
